Traffic affects you

Living in a city means the traffic situation impacts accessibility, where a minor incident can often have widespread implications. To ensure an efficient journey, it is important that you receive information about the current traffic situation. Using this information you can then make a decision about route choice, mode of transport and also time for your journey.

Everything in one place

Trafiken.nu collects all traffic information in one place. The service provides information that helps you to make intelligent choices, whether you travel by public transport, bicycle, car or a combination of these. Using the journey planner, you can search for journeys using different modes of transport or a combination of these in the Stockholm region. The journeys can be compared in terms of travel time, cost and environmental impact.

At Trafiken.nu in Stockholm you can find information about:

- Public transport times and travel suggestions
- Current speeds on approach roads
- Possible disruption on public transport
- Cycle paths and cycle maps
- Road accidents and other obstacles for road traffic
- Road works
- Road condition and weather
- Parking

During a journey you can access Trafiken.nu using our mobile website. The address is mobil.trafiken.nu

Trafiken.nu is also available in other regions in Sweden.

You can make a difference

Information used at Trafiken.nu is obtained from:

- The road traffic management centre Trafik Stockholm
- SL
- The Police and SOS Alarm
- Sensors in or alongside roads
- Roadside cameras
- Swedish Transport Administration contactors
- The City of Stockholm
- Private people and road informants who phone and report traffic obstacles and disruption on the roads

Trafiken.nu is also used by newspapers, TV and radio stations for forwarding traffic information to the general public. Road users can phone and report acute traffic obstacles on the roads to Trafik Stockholm, phone 020-290 290.
